

Timon

Brand guidelines

Version 1.0 · October 2026

The planning is the interface.

Timon is open all day on a dispatcher's screen. Everything around the planning stays quiet, so that colour on screen always means something.

1

Show the trade

A row is a real driver with his tractor, his trailer and his deadlines. Not a calendar slot.

2

Never miss a conflict

A conflict is drawn, named, and always comes with a solution and its cost.

3

Dense, not cramped

Thirty resources on one screen, readable at a glance. Figures line up.

4

One accent at a time

Petrol acts. Brass marks the time. Nothing else competes for attention.

02 · NAME AND LOGO

The ring that holds it together.

In French, a *timon* is the drawbar that ties a team to its wagon. The logo keeps the one part that holds everything: the coupling ring, set in brass in place of the o.

At small sizes the ring takes back its drawbar.
That is the icon: favicon, app tile, avatar.

Use it plainly.

On light surfaces: ink letters, brass ring.

On the dark application bar: light letters, light brass ring.

The icon, from 64 down to 16 px.

Clear space and size

Keep the ring's diameter free on every side. The logo is never narrower than 72 px; below that, use the icon.

✗ Recolour the ring

✗ Stretch or distort

✗ Drop the ring for a plain o

✗ Place it on a busy background

Petrol acts, brass tells the time.

Colour never speaks alone.

Every status pairs a colour with a word, an icon or a pattern, so it reads in black and white and for colour-blind dispatchers.

 Chartered — Curtain-sider

Unit links

Tractor and trailer joined by a short bar, like the drawbar itself. A missing driver is a dashed link.

Brass time line and load curve

Now is always brass. The curve shows how busy each two hours are; nights shrink to a quarter.

Two-lane conflict

Two orders that overlap split the row over a hatched area. The problem is visible before it is read.

- ☒ **Reassign to K. Benali** Recommended
Free 14:15–20:00 · curtain-sider · +14 km empty
- ☐ **Move to 17:15**
Delivery around 20:45, outside the customer slot (by 19:30)
- ☐ **Subcontract to Transports Vial**
Contract rate €340 excl. VAT · available

Costed solutions

Each way out of a conflict states its price: empty kilometres, a missed slot, a subcontractor's rate.

Built from 28 parts.
